## Join Us for This Special Virtual HHA/PCA Inservice Training in Emerging Infectious Diseases, Novel Influenza & Infections in the HCBS Population

HCANYS and IPRO invite home health aides and personal care aides to a free virtual training on Tuesday, June 16, 2026, from 11:00 a.m. to 12:30 p.m.

Are you up to date on the infections that have the potential to affect your patients, the dangerous complications that can arise, and the precautions to take to protect both yourself and those in your care? This 90-minute program will equip you with the knowledge and skills to help protect yourself and your patients from infectious diseases. You will learn how to recognize warning signs, apply infection control precautions in the home, and respond when a patient's condition changes. Case scenarios and Q&A are built into the session.

This interactive training is designed to correspond to the New York State Department of Health's regulatory criteria, which counts toward your annual in-service requirement in infection control. Faculty experts from HCANYS and IPRO will lead the webinar.

If you have any questions regarding HCA's emergency preparedness programs or how you can get involved, please contact Dr. Peter Chernack, Executive Vice President, HCANYS, [pchernack@hcanys.org](mailto:pchernack@hcanys.org).
